PATENT COOPERATION TREATY

From the INTERNATIONAL BUREAU

NOTIFICATION OF TRANSMITTAL OF COPIES OF TRANSLATION OF THE INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (CHAPTER I OR CHAPTER II OF THE PATENT COOPERATION TREATY) (PCT Rule 72.2)

To:

NAKAMURA, Tomoyuki c/o Miyoshi International Patent Office Toranomon Kotohira Tower 2-8, Toranomon 1-chome Minato-ku, Tokyo 105-0001 **JAPON**

Date of mailing (day/month/year) 01 September 2005 (01.09.2005)

Applicant's or agent's file reference

PCT/JP2003/016339

International application No.

JSONY-486PCT

IMPORTANT NOTIFICATION

International filing date (day/month/year) 19 December 2003 (19.12.2003)

Applicant

SONY CORPORATION et al

1. Transmittal of the translation to the applicant.

The International Bureau transmits herewith a copy of the English translation made by the International Bureau of the international preliminary examination report established by the International Preliminary Examining Authority.

2. Transmittal of the copy of the translation to the elected Offices.

The International Bureau notifies the applicant that copies of that translation have been transmitted to the following elected Offices requiring such translation:

CN, KR

The following elected Offices, having waived the requirement for such a transmittal at this time, will receive copies of that translation from the International Bureau only upon their request:

US

3. Reminder regarding translation into (one of) the official language(s) of the elected Office(s).

The applicant is reminded that, where a translation of the international application must be furnished to an elected Office, that translation must contain a translation of any annexes to the international preliminary examination report.

It is the applicant's responsibility to prepare and furnish such translation directly to each elected Office concerned (Rule 74.1). See Volume II of the PCT Applicant's Guide for further details.

Applicant SONY CORPORATION						
 This report is the international preliminary examination report, established by this International Preliminary Examining Authority under Article 35 and transmitted to the applicant according to Article 36. 						
2. This REPORT consists of a total of 3 sheets, including this cover sheet.						
3. This report is also accompanied by ANNEXES, comprising:						
a. (sent to the applicant and	a. (sent to the applicant and to the International Bureau) a total of 5 sheets, as follows:					
sheets of the description, claims and/or drawings which have been amended and are the basis of this report and/or sheets containing rectifications authorized by this Authority (see Rule 70.16 and Section 607 of the Administrative Instructions).						
sheets which supersede earlier sheets, but which this Authority considers contain an amendment that goes beyond the disclosure in the international application as filed, as indicated in item 4 of Box No. I and the Supplemental Box.						
b. (sent to the International Bureau only) a total of (indicate type and number of electronic carrier(s)) , containing a sequence listing and/or tables related thereto, in computer readable form only, as indicated in the Supplemental Box Relating to Sequence Listing (see Section 802 of the Administrative Instructions).						
4. This report contains indications relating to the following items:						
Box No. I Basis of the report						
Box No. II Priority						
Box No. III Non-establishment of opinion with regard to novelty, inventive step and industrial applicability						
Box No. IV Lack of unity of	of invention					
Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement						
Box No. VI Certain documents cited						
Box No. VII Certain defects in the international application						
Box No. VIII Certain observations on the international application						
Date of submission of the demand		Date of completion of this report				
14 May 2004 (14.05.2004)		08 February 2005 (08.02.2005)

International application No.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY

PCT/JP03/16339

Box No. V Reasoned statement under Article 35(2) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement					
1. Statement					
Novelty (N)	Claims	1, 2, 4, 6	YES		
	Claims		NO		
Inventive step (IS)	Claims		YES		
	Claims	1, 2, 4, 6	МО		
Industrial applicability (IA)	Claims	1, 2, 4, 6	YES		
	Claims		NO		

2. Citations and explanations (Rule 70.7)

Document 1: JP, 8-37778, A (Sony Corp.), 6 February, 1996 (06.02.96)

Document 2: JP, 2002-64981, A (Sony Corp.), 28 February, 2002 (28.02.02)

Document 3: JP, 3-15269, A (Fuji Electric Co., Ltd.), 23 January, 1991 (23.01.91)

Document 4: Microfilm of the specification and drawings annexed to the written application of Japanese Utility Model Application No. 108886/1990 (Laid-open No. 64989/1992), (Fuji Electric Co., Ltd.), 4 June, 1992 (04.06.92)

Document 5: JP, 2002-247852, A (Sony Corp.), 30 August, 2002 (30.08.02)

Document 6: JP, 2001-333574, A (Matsushita Electric Industrial Co., Ltd.), 30 November, 2001 (30.11.01)

Document 7: JP, 2002-112542, A (Fujitsu General Ltd.), 12 April, 2002 (12.04.02)

The subject matters of claims 1 and 2 do not appear to involve an inventive step in view of documents 1-3 cited in the ISR. Because (1) a switching power-supply circuit having a power-factor improvement circuit, described in document 1, (2) a switching power-supply circuit having both (a) a constant-voltage control means using frequency control and (b) a constant-voltage control means using inductance control, described in document 2, and (3) a constitution of switching power-supply circuits, described in document 3, wherein a plurality of switching power-supply circuits each having (a) a plurality of output parts and (b) a switching means to control the timing of supply on one of the said output parts, are provided in parallel, wherein the said plurality of output parts of each of the said plurality of switching power-supply circuits are activated in a particular order, belong to technical fields closely related to one another, a person skilled in the art could have easily conceived of the idea of applying a constant-voltage control means using frequency control and a constant-voltage control means using inductance control, both described in document 2, and a means described in document 3 whereby a plurality of switching power-supply circuits are so constituted in parallel connection as to obtain a plurality of direct-current output voltages wherein the plurality of output parts are activated in a particular order, to a switching power-supply circuit having a power-factor improvement circuit, described in document 1.

The subject matter of claim 4 does not appear to involve an inventive step in view of documents 1-3 and 5 cited in the ISR. A switching power-supply device having a rectifying means to switch between voltage-doubling rectifying operation and equal-voltage rectifying operation is described in document 5.

The subject matter of claim 6 does not appear to involve an inventive step in view of documents 1-3 and 5-7 cited in the ISR. Using a plurality of output voltages of a switching power-supply device for drive-power supply for a plasma display device is well known, as described in documents 6 and 7.
